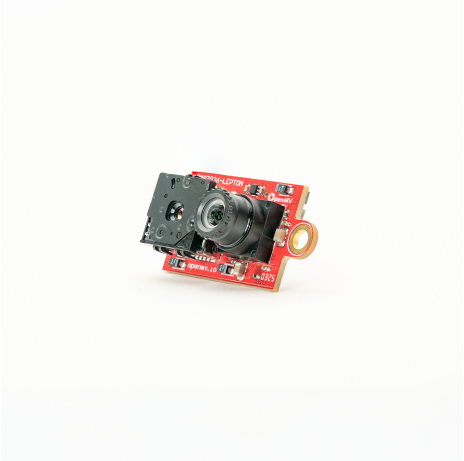
OpenMV® Multispectral Thermal Camera Module

Datasheet

SKU: Multispetral-Thermal-Camera-Module / Multispetral-Thermal-Camera-Module-OV5640

Description

The Multispectral Thermal Camera Module allows your OpenMV Cam to interface with the FLIR Lepton 1/2/3 thermal imaging sensors for thermal vision applications and interface with a color camera sensor at the same time. Now you can process thermal images mixed with color simultaneously. Available in two variants: PAG7936 1 MP 120 FPS color global shutter (N6 only) or OV5640 5 MP color rolling shutter (RT1062). The FLIR Lepton sensor is sold separately via GroupGets.



Target Areas

Thermal imaging, multispectral vision, temperature measurement, HVAC diagnostics, industrial inspection, security, firefighting, predictive maintenance.

Key Features

- **Dual imaging** — Simultaneous FLIR Lepton thermal + color camera (PAG7936 or OV5640).
- **FLIR Lepton 1/2/3** — Supports Lepton 1, 2, and 3 thermal modules (sold separately via GroupGets).
- **Two color sensor options** — PAG7936 1 MP 120 FPS global shutter (N6) or OV5640 5 MP rolling shutter (RT1062).

Contents

1 Specifications

1.1 Thermal Sensor

1.2 Color Camera — PAG7936 Variant

1.3 Color Camera — OV5640 Variant

2 General Info

5 Revision History

1 Specifications

1.1 Thermal Sensor

Component	Details
FLIR Lepton Socket	Supports FLIR Lepton 1, 2, and 3 thermal imaging sensors. Sensor sold separately via GroupGets.

1.2 Color Camera — PAG7936 Variant

Component	Details
Sensor	PAG7936 1 MP color global shutter sensor at 120 FPS.
Compatibility	OpenMV N6 only.

1.3 Color Camera — OV5640 Variant

Component	Details
Sensor	OV5640 5 MP color rolling shutter sensor.
Compatibility	OpenMV Cam RT1062.

2 General Info

Dimension	Value
Weight	3 g
