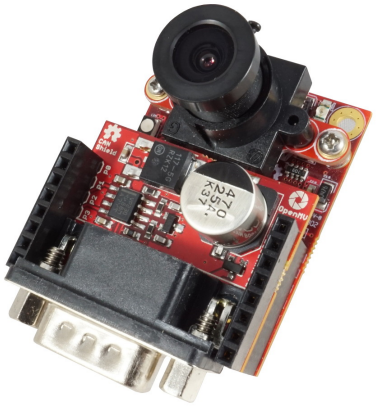
# OpenMV® CAN Shield

Datasheet

SKU: OMV-SHIELD-CAN-V1

## Description

The CAN Shield allows your OpenMV Cam to communicate with other devices on the CAN bus at baud rates up to 1 Mb/s. The DB9 connector connects to a normal DB9 CAN connector and also supports the OBDII bus layout, selectable via solder bridges on the bottom of the shield. The shield features an on-board voltage regulator so you can power your OpenMV Cam with 12 V. This is the retired standalone CAN Shield — see the current CAN/RS232 Shield for the latest design with combined CAN and RS232.



## Target Areas

CAN bus communication, automotive (OBDII), industrial automation, vehicle diagnostics.

## Key Features

- **CAN bus up to 1 Mb/s** — Communicate with devices on the CAN bus at up to 1 Mb/s.
- **DB9 connector** — Standard DB9 CAN connector with OBDII bus layout option via solder bridges.
- **12 V input** — On-board voltage regulator accepts 12 V to power your OpenMV Cam.

# 1 Features

## 1.1 CAN Bus

| Component | Details |
|---|---|
| **Speed** | Up to 1 Mb/s. |
| **Connector** | DB9 connector. Supports standard DB9 CAN pinout and OBDII bus layout (selectable via solder bridges on bottom). |

## 1.2 Power

| Component | Details |
|---|---|
| **Voltage Regulator** | On-board regulator accepts 12 V input to power your OpenMV Cam. |

## 1.3 Compatibility

| Component | Details |
|---|---|
| **Supported Cameras** | All OpenMV Cam models. |

# 2 General Info

| Dimension | Value |
|---|---|
| Weight | 35 g |
