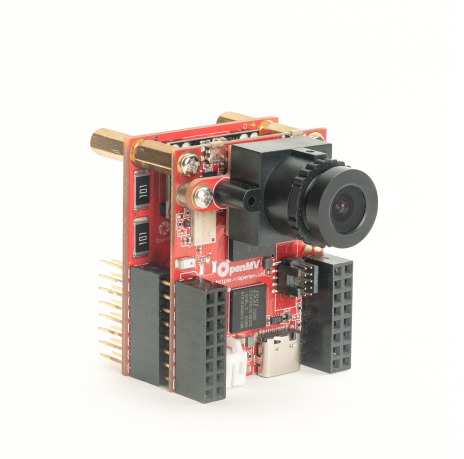
OpenMV® PoE Shield

Datasheet

SKU: OMV-SHIELD-POE

Description

The PoE Shield lets you connect your OpenMV Cam to PoE Ethernet, providing a one-cable solution for power and connectivity. It features a 10/100 Mb/s capable Ethernet jack with IEEE 802.3af PoE support providing up to ~6 W of power. The shield supplies 5.4 V via VIN through an OR'ing diode, allowing it to be combined with other dual header column shields. Peak UDP transmit performance exceeds 90 Mb/s using Python sockets with the RT1062. Headers do not come pre-soldered.



Target Areas

Network-connected vision, IP camera, remote monitoring, industrial Ethernet, PoE-powered deployments, one-cable installations.

Key Features

- **10/100 Mb/s Ethernet** — 10/100 Mb/s capable Ethernet jack.
- **IEEE 802.3af PoE** — Power over Ethernet providing up to ~6 W to your OpenMV Cam.
- **One-cable solution** — Single Ethernet cable provides both power and data connectivity.
- **90+ Mb/s throughput** — Peak UDP transmit performance exceeds 90 Mb/s with RT1062.
- **Shield stacking** — Supplies 5.4 V on VIN via OR'ing diode for multi-shield combinations.

1 Features

1.1 Ethernet

Component	Details
Speed	10/100 Mb/s Ethernet.
PoE	IEEE 802.3af compliant. Provides up to ~6 W of power.
Performance	Peak UDP transmit exceeds 90 Mb/s using Python sockets (tested with RT1062).

1.2 Power Output

Component	Details
VIN	Supplies 5.4 V via VIN through OR'ing diode. Compatible with other dual header column shields that supply VIN via OR'ing diode.

1.3 Compatibility

Component	Details
Supported Cameras	Only OpenMV Cams with onboard Ethernet: OpenMV Cam N6 and OpenMV Cam RT1062.

Headers do not come pre-soldered.

Comes with mounting hardware and screws.

2 General Info

Dimension	Value
Weight	23 g
